## Skills

### Software Engineering

Creating websites and applications from scratch and implementing new solutions.

### Technical Analysis

Reading and analyzing code for errors and optimizations

Creating technical specifications

### Website optimizations

Core Web Vitals optimizations, implementing caching systems, improving application performance.

### Git

Proficient with knowledge of Git Flow.

### UI/UX

I know the basics and I can put myself in the user's shoes

### Live media production

Working with Pro Presenter 6/7, event media production

### Live sound production

I know the basics of sound engineering, currently I work mainly with the Behringer X32 console

### Live sound production

I know the basics of sound engineering, currently I work mainly with the Behringer X32 console

## Interests

Fishing

Video Games

## Summary

### Programming Experience and Skills

I got interested in programming at age 13, and since 2013 I have been working professionally as a programmer. My experience spans a wide range of projects, from creating responsive HTML/CSS templates to designing and implementing scalable systems with micro-services architecture.

### Technologies and Programming Languages

I primarily work in PHP and JavaScript, and I also have experience with languages such as C#, C++, Java, TypeScript, and JSX. I've worked with relational databases, including MySQL and SQLite, effectively utilizing them in projects of various scopes.

### Systems and Platforms

I have built projects from scratch using popular CMSs and frameworks like WordPress, Drupal, Joomla, Magento, Symfony, Laravel, Svelte, ReactJS, and React Native. I also have experience with projects based on technologies like Blazor, Gatsby, and NativeScript.

I am proficient with Docker, Git, and familiar with Git Flow.

### Design Patterns and Methodologies

I apply SOLID principles, DRY, and design patterns that enable the creation of clear, scalable, and maintainable code. I also have a foundational understanding of UX and a keen aesthetic sense, which helps me create applications that emphasize the user experience.
